Feedback and FAQs

HouseCall is Trend Micro's highly popular and capable on-demand scanner for identifying and removing viruses, Trojans, worms, unwanted browser plugins, and other malware.

HouseCall 7 features an intuitive interface and the ability to perform fast scans that target critical system areas and active malware. It also leverages the Trend Micro Smart Protection Network™ to help ensure that scans catch the latest threats.

HouseCall 7.1 improves on the recently released HouseCall 7.0 by providing a full system scan option and an option to scan only specific folders. It adds support for 64-bit versions of Windows Vista™ and Windows™ 7.

HouseCall provides a quick and easy check for threats regardless of the protection status of your existing security solution. For more information about HouseCall, please read the [Frequently Asked Questions](#).

What's new in HouseCall?

- Full system and custom scan options allow users to specify which folders to scan (new in 7.1).
- Quick scan option offers targeted scanning of critical system areas and active threats, reducing scan times to within a few minutes.
- Stand-alone, browser-independent implementation eliminates compatibility issues associated with browser-activated scanners.
- Smart Scan technology refers to patterns in the cloud, delivering the latest protection while reducing download times.
- Smart Feedback shares threat information with the Smart Protection Network, which correlates data from a global intelligence network to quickly discover new threats.
- Review and restore lets you check and compare scan results and recover files.
- Enhanced detection and cleanup addresses rootkits and other sophisticated threats.
